

MAGO Compare the Editions

How do the various Mago4 Editions differ? This page sports a comparative table to help you choose the one that better fits your company needs.

The list below presents the features that make the difference between the single editions of the product, but it is not a complete list of the functionalities provided by Mago4. For a complete list of functionalities, please refer to the dedicated area of our website.

Notes for consultation:

- The items with **grey background** represent the application modules.
- The symbol √ in correspondence with a module (gray line) indicates that the module is active and always included
- The symbol √ in correspondence with a function (white line) indicates that the function is present if the module that contains the function is present, too
- The symbol • indicates that the module can be activated on the specified edition of the product
- RO stands for ROMANIA, HU for HUNGARY, PL for POLAND, IT for ITALY, CH for SWITZERLAND, BG for BULGARIA

Warning: this list is merely indicative and may change without notice.
